## Ford Bi-Fuel Super Duty with Westport READY-link™

### For F-250 / 350

The Westport READY-link mounting system is a unique design that allows the installation of specifically designed service bodies to be installed with the Westport WING™ Power System on Ford Super Duty trucks with box-delete. To ensure quality, the Westport WING Power System is completely installed and tested by Westport™ and the compatible service body is installed by Knapheide®, a leading manufacturer of standard service bodies. And now, Westport authorized dealers can offer fleet customers not only the best CNG power system, but also the most popular service bodies in America.

#### ENGINEERING EXCELLENCE

- As a Ford-approved Qualified Vehicle Modifier (QVM), Westport has developed an advanced, fully integrated, bi-fuel system that meets and exceeds original equipment manufacturing (OEM) standards.
- Ford F-Series WING Power System bi-fuel trucks undergo the same rigorous testing for safety and durability required for all Ford OEM products and are designed to meet EPA emission requirements.

#### key-READY™ EXPERIENCE

- The WING Power System is designed, built, installed and delivered key-READY through authorized Ford Dealer / Distributors.
- The existing Ford Motor Company warranty remains intact. The WING Power System warranty matches the Ford warranty for all like components.

#### WING POWER SYSTEM SPECIFICATIONS

- C6.2L V8 engine with gaseous prep manifold, hardened valves, and seats.
- Stainless steel fuel lines, fittings, and injector rails.
- Available on all cab offerings and on all trim levels.
- 4x2 or 4x4 powertrain configurations.
- 18.4 or optional 24.5 gasoline gallon equivalent (GGE) Type 4 composite CNG fuel tank.
- Non-selectable, CNG primary start with gasoline secondary when CNG is exhausted - automatic transition to gasoline after CNG is depleted.
- Backlit, integrated, easy-to-read CNG fuel gauge.

#### WING POWER SYSTEM ADVANTAGES

- According to a Kelley Blue Book Study on CNG, it is estimated that after three years the WING Power System will hold about 50% of its original value.

Westport™, the global leader in natural gas engine technology, and Knapheide®, the leading manufacturer of standard service bodies, are setting a new standard – delivering a natural gas, work-ready vehicle solution.

## INTRODUCING THE NEW Westport READY-link™ Mounting System

**The right truck. The right engine. The right fuel.**

The Westport WiNG™ Power System with the READY-link mounting design is only available on the Ford F-250 and F-350 with 8' box-delete. Knapheide has specially designed KNAP-link™ 56" CA single rear wheel service bodies to fit with the READY-link mounting system. This includes the standard 600 series, which consists of a traverse compartment for the CNG tank, a vertical and a horizontal compartment on each side of the body.

| Knap-Link 696 – 50J44 – WCNG (56" CA, SRW)

| Knap-Link 696 – 50FJ44 – WCNG (56" CA, SRW, Flip Top)

**Together, Westport and Knapheide can provide a quality turn-key experience, including quality installation, complete fuel system integration from factory to delivery, and single ship-through – resulting in lower logistic costs and faster delivery.**

Westport offers custom-build bodies through Knapheide and other body manufacturers with a minimum order of 10 units. Please contact a Westport Sales Representative for details.
