About World CNG

World CNG is a nationally recognized alternative fuel vehicle company dedicated to the development, fabrication, and installation of alternative fuel technology.

World CNG specializes in the conversion of passenger and cargo vehicles to use compressed natural gas (CNG).

The company is committed to bringing the best alternative fuel vehicle experience to drivers, fleet owners, and consumers with their innovative quality, safety, and technology.

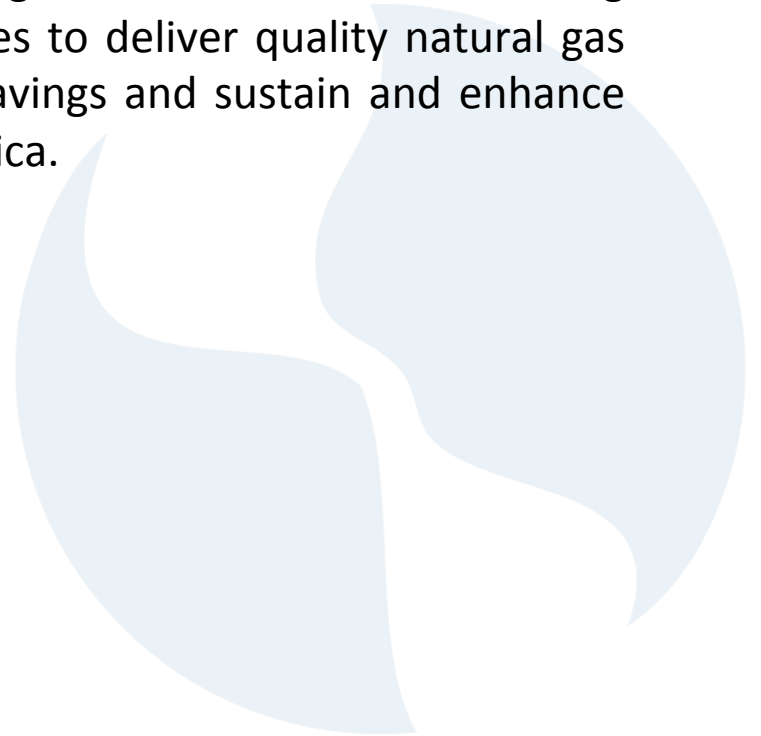

Mission and Values

World CNG is committed to protecting the environment, health and safety of our employees and customers, and the communities where we operate. We adhere to these values and recognize that by integrating them into all aspects of our business, we can offer technologically innovative natural gas vehicles while conserving resources for future generations. World CNG strives to deliver quality natural gas powered vehicles that save money through fuel savings and sustain and enhance the environment and the health and safety of America.

Principal Values

1. Obey the law
2. Value open and honest relationships
3. Conduct business with integrity
4. Be passionate

Wholesale – Installer Network

The World CNG Installer Network spans nationwide and is comprised of reputable companies in the automotive industry. These installers are carefully selected to uphold World CNG's values and quality workmanship.

World CNG supplies the installers with everything they will need to successfully operate a CNG conversion and service shop, this often includes training and sales support.

Parts Distribution

World CNG has a wide range of CNG conversion parts and cylinders to offer installers outside of the installer network

- High pressure tank packages w/ installation manuals
- CNG cylinders – Type I, II, III, & IV
- Mounting brackets and cylinder cradles
- Manual and solenoid valves
- Filters, gauges, receptacles, and additional CNG conversion components

Advantages

- Large inventory levels for quick turnaround
- Competitive pricing
- Superb customer service
- Quality assurance
